SAUDI PAPER GROUP

We are Saudi Paper Group. By combining the efficiency of a large organization with the customer-centric attributes of small-scale company, we at SPG have earned the expertise of orchestrating a phenomenal paper empire.

We are driven by a belief that quality is never an accident; it is the result of dedication and passion. At SPG, quality and customer satisfaction lie at the heart of everything we do, which is why we are recognized and acknowledged as high-quality paper manufacturers and suppliers across the Kingdom.

Our operations include Saudi Paper Manufacturing Company (SPM), Saudi Paper Converting Company (SPC) and Saudi Recycling Company (SRC). While SPM remains the largest manufacturer of tissue rolls in Saudi Arabia, SRC is the region's most trusted collector and processor of wastepaper for recycling.

SPC, our paper converting arm, is focused towards offering high quality converted tissue paper products under the brand names: Mouchoir, Excellence, City and SPC PRO.

Abu Dhabi National Paper Mill

Set up in the year 2000, ADNPM is the largest and most advanced manufacturer of hygienic jumbo tissue rolls in the United Arab Emirates with an annual production capacity of more than 90,000 tons. Spread over 60,000 square meters, the plant houses 3 state-of-the-art Crescent Former Machines including the latest “Advantage New Textured Tissue (NTT)” machine that produce world-class tissue paper from the highest grade virgin pulp.

Our NTT Machine can produce all grades in both plain and textured mode with higher Bulk, Softness and Water Absorbency than conventional tissue. Our facility also has the most sophisticated De-inking recycling plant in the region which produces tissue paper from recovered office wastepaper.

At ADNPM, we are an emerging market leader, our products are manufactured to global standards, and most sought after by local, regional and international converters. We produce jumbo tissue rolls that are used in making table napkins, kitchen towels, facial tissue and toilet paper in white and a range of other FDA-approved colors.

Web: www.famaproject.com

Contact: Stefania Gasparotto / Marketing manager

Mobile: +39 3452535665

Email: s.gasparotto@famaproject.com

Founded in 1992 in Thiene, Vicenza, Italy, FAMA has been dedicated to industrial plant engineering from the very beginning. The company first specialized in the aspiration of dry materials in various sectors, including the waste from the paper industry. Over time, and thanks to the professionalism of specialized technicians, many devices have been added to the range, such as shredding vacuum cleaners, paper and cardboard shredders, and separators, making the plant offering more complete and ensuring high performance.

Subsequently, FAMA collaborated with professionals in the electronics and automation sectors, which, thanks to continuous and lasting cooperation, facilitated FAMA's entry into the digital 4.0 era. A growing sensitivity towards ecology and the need to maintain healthy working environments, combined with the requirement to comply with increasingly restrictive regulations set by occupational medicine and other environmental authorities, have led FAMA to study dust filtration systems for paper that comply with the requirements of the bodies responsible for monitoring and protecting the environment, health, and safety in the workplace.

FAN SEPARATOR GmbH

Address: Bernecker Straße 5 Marktschorgast,
Bavaria 95509 Germany

SEPARATOR
A BAUER Group company

Contact: Bernhard Schatte / Sales and Marketing Manager
Mobile: +43 664 80210310
Email: b.schatte@fan-separator.de

The pioneer in separation technology "FAN SEPARATOR GmbH" - a company of the Austrian BAUER Group - is presenting its latest product upgrades at this year's PAPER & TISSUE Show in Abu Dhabi, United Arab Emirates. From the FAN PSS separator, for the separation of wastewater into a liquid and a solid fraction with high dryness (such as dewatering of fine reject or sludge from a dissolved air flotation), the FAN SPS sludge separator, for the dewatering of secondary sludge, the FAN PRP screw press, for dewatering of pulper plastic rejects, to cleaners, mixers and pumps:

FAN SEPARATOR, best results at low energy consumption, user-friendly control, compact design, excellent manufacturing quality as well as extremely long service life. A positive contribution toward the strengthening of the environmental profile and an increase in competitiveness!

Best economic and operational efficiency in the separation of reject, effluent and sludge. FAN SEPARATOR: FANtastic for the paper industry and the environment!

The logo for Fastpap, featuring the word "Fastpap" in a bold, blue, sans-serif font.

Fastpap has been developing and manufacturing solutions for higher process efficiency and lower costs for the pulp&paper industry over 30 years.

The company's expertise is cleaning and cutting solutions mainly based on high pressure water jet technology. So far, Fastpap has over thousand references worldwide.

FELTEST

Address: Soerense Zand Noord 26, 6961 RB Eerbeek
Gelderland Netherlands
Phone: +31 313 652 215
Email: info@feltest.com
Web: www.feltest.com

Contact: Michelle Koster-Chong / International Account Manager
Mobile: +31 313 652 215
Email: michelle.koster-chong@feltest.com

Did you know that press felts are key to maximizing your mill's efficiency? If the sheet exits the press section just 1% drier, your production output could increase by up to 4%.

Unpredictable felt performance do not have to disrupt your operations. Costly downtime and far-from-optimal output can become a thing of the past.

With Feltest's handheld measuring instruments, you can easily gather daily data on your press felts' performance. This allows you to spot potential issues early, reduce unplanned stops, and keep your machines running smoothly—all without CAPEX.

With over 25 years of in-depth experience in the paper industry, Feltest is an expert in the field of press felt optimization.

Tissue converting lines and much more.

Our philosophy is that of tailor made. Over 150 years of business we have learned to create technologies capable of satisfying the well-being of the end consumer.

We have created converting lines – professional and consumer lines – to be assembled according to our customers' needs. Furthermore, we have invented individual components able to revolutionize existing lines.

Tailor-made technologies but still with excellent quality, because well-being cannot be separated from quality. In our TissueHub, which is a laboratory of ideas, this is what we do: test the combinations of our machines to ensure quality at every stage of production.

Konya Kağıt A.Ş., one of the leading companies in its industry with its 32-year history and accumulation of knowledge, has been serving since 1989 in a total area of 105 thousand m², half of which is closed, in Konya Organized Industrial Zone and Istanbul Güneşli facilities. Konya Kağıt A.Ş., which has been among the top 500 and second 500 Largest Industrial Enterprises of ISO (Istanbul Chamber of Industry) since 1998, continues to create value for the industry with an average of 461 employees strong. Konya Kağıt A.Ş. consists of 4 main production units, including paper production, printing packaging and notebook production in Konya, printing packaging production facilities in Istanbul Güneşli.

Paper Production Plant

Our paper production plant has a capacity of 100 thousand tons/year; within the scope of TS11610 standard, it produces FSC ® 1st class pulp writing paper, (White woodfree offset paper-roll and sheet) with in the range of 50 – 200 g/m² roll and paper size, and also within the scope of TS EN 12281 standard, it produces FSC ® copy paper in A3, A4, A5 sizes. Ivory and other colored paper productions are also produced with the X-RITE fully automatic control system.

Our factory, which is sensitive to nature, forest and environment in paper production, also has a certificate called FSC ® (Forest Stewardship Council ®-CoC (Chain of Custody)) which is valid all over the world. All cellulose raw materials (virgin pulp), consists of trees obtained from the area of the plantation.

Our manufactured products are allowed to be shipped after the tests in automatic control devices and the samples taken in our laboratory equipped with the latest system devices, at every stage. Following closely the production technologies in the world, in Konya Kağıt San. ve Tic. A.Ş., the entire process from pulp preparation to buffer output is automatically controlled by DCS and QCS control systems.

Email: a.burhanbilgin@marbilkagit.com

Our company started its operations in 2018.

As a company, we have undergone a rapid development process, doubling our capacity to reach 250 tons per month, thereby achieving our initial goals.

When we first started, we were working with our clients' brands, but today, we have grown to manufacture a significant portion of the industrial paper group under our own brand.

As a company, our focus is to diversify our business partnerships within Turkey and implement a balanced sales management both domestically and internationally.

In addition to finished products, we provide solutions for semi- finished reel needs to converting paper manufacturers, with whom we collaborate and maintain contact globally, alongside our team of experts.

Initially, we conducted our sales in the domestic market, but by bringing industry specialists into our team, we expanded to export, making our brands visible in many regions around the world.

MEPCO is considered to be one of the largest producers of paperboard in the Middle East, with a production capacity of half a million metric tons.

The company produces a diverse range of CONTAINERBOARD grades (High Performance Fluting, Test Liner, Semi-Chemical Fluting, Kraft Liner Board, Dual Use & White Top Test Liner) along with other grades of INDUSTRIAL PAPER (Core board, Plasterboard Liner, & Absorbent Kraft) on three paper machines.

MEPCO's strategic location and proximity to Jeddah sea port provides the company with the ability to deliver its products to a wide array of markets within a very short lead time. The company is present mainly in the Middle East, North & East Africa along with the Indian Subcontinent and a few European Markets.

MEPCO is intensely investing in research and development, to provide a wide range of prime quality and innovative products to its loyal partners and customers. MEPCO core values are to provide high-quality products for its clients, and to contribute environmental preservation and to meet the market needs.

Since the beginning MEPCO has been conscious of preserving our environment.

Recycling waste paper and transforming it into its various state of the art products.

Concern for the environment is extend to all aspects related to the production process, starting from water treatment, utilizing renewable chemical additives, and ending with an endless effort to keep our world green.

MULTIPACK SRL

NF Kimya was established in 2009 with the aim of producing and technically selling textile auxiliary chemicals, textile dyes, and water treatment chemicals. It continues its operations at its facilities in the Denizli Organized Industrial Zone, located on 10,000 m² of land with a monthly capacity of 4,000 tons, and at its facilities in Tashkent, Uzbekistan, with a monthly production capacity of 2,000 tons. NF Kimya is expanding its organizational network across the country and operates in many regions of the world, primarily in Turkey. It provides services with personnel and warehouse facilities in every region of Turkey, as well as operating in Pakistan and Uzbekistan.

With our inclusion in the Enkimteks family in 2017, our optical brightener production capacity under the ENBRITE brand has reached 500 tons per month. During the establishment phase, market needs, sustainability, and environmental awareness were particularly considered, and these have been adopted as a vision in line with international standards. With investments in R&D and production, NF Kimya has enhanced its solution-oriented services in laboratories and aims to renew and develop itself every day. In this context, it provides its customers with the fastest and most accurate service.

Parason Group is distinguished among the foremost manufacturers and suppliers of avant-garde pulp and paper machinery, asbestos, and tableware. Established by esteemed scientist and metallurgist, Dr. Desarda, the Group epitomizes a legacy of innovation and expertise in the industry.

Founded in 1977 with a modest Foundry, Dr. Champalal Desarda, Ph.D. holder in Metallurgy from BRNO University, Czechoslovakia, specialized in High Chrome Steel Alloys, laying the foundation for a remarkable 46+ years of success. Under Dr. Desarda's visionary leadership, Parason has evolved into a global powerhouse, providing turnkey solutions to paper mills in approximately 70 countries.

Parason's extensive product range serves various Paper Mills, Molded Fiber, and Hard Board Paper Mills. Specializing in Refiner Discs, we are global leaders, manufacturing these top-tier discs in our foundry. Also, Parason offers global consultancy services, providing comprehensive support for establishing new paper mills and invaluable guidance for surpassing goals in existing mills.

Our journey began with a single mission: to help customers make exponentially better decisions by providing the most accurate data and analytics available, supplemented with high-value strategic consulting.

Over the years, we've transformed from a collection of legacy companies into a unified leader in market intelligence, trusted by businesses, governments, and organizations worldwide. Our expertise spans forest products, pulp and paper, biofuels and low-carbon feedstocks, and chemicals, providing data and insights that fuel success in industries that form the backbone of our global economy.

At ResourceWise, we believe that great decisions stem from great insights. Our deep industry knowledge, paired with advanced technology and a commitment to transparency, means we provide not just data, but a pathway forward in an increasingly complex world.

We provide more than just market reports; we offer the tools and insights needed to drive innovation, solve sustainability challenges, and unlock new opportunities. With our solutions, clients can confidently navigate the changing landscape of natural resources, knowing that every decision they make is backed by data and analysis that is reliable, accurate, and forward-thinking.

The Saudi Paper Converting Company was established in 2001 to produce a variety of consumer paper products.

Our manufacturing process enables us to provide a wide range of our products to the market and to large companies every year, with a manufacturing capacity estimated at 40,000 tons annually, with continuous development of machines to increase production capacity and improve the quality of the final product to keep pace with development according to market variables, using the latest machines from the world's leading suppliers in this field. This includes our production of large tissues that are used as raw materials that are eventually converted into consumer products such as facial, kitchen and bathroom tissues, in addition to other types and classifications of paper tissues that bear the brand names of Mouchoir, City, Excellence and SPC Pro.

Our expertise and advanced capabilities in the field of converting and manufacturing paper helped us achieve the highest quality standards in the local and global markets, as internal quality assurance processes are integrated for each product that comes out with the company's trademark, which will build trust with the customer and win his loyalty

الشركة السعودية لصناعة الورق
Saudi Paper Manufacturing Co.

We are truly a one stop solution to all needs in the paper industry. We are considered experts in the field of "jumbo roll" manufacturing, as we produce the best selection for companies that use these raw materials to convert them into consumer products. We are also the industry leader in consumer products, offering a wide range of products to meet the everyday needs of consumers. Our products in this regard include facial and pocket tissue, toilet tissue, kitchen tissue, maxi rolls and other products related to paper products.

We are currently operating at maximum capacity for manufacturing, conversion, and recycling.

The company has the strength and ability to supervise the entire paper production cycle in its factory – starting from the manufacture of "jumbo rolls" to the tissue

Smart Surplus Solutions: TISSUE TEC Sales & Service GmbH is your reliable partner for selling your obsolete tissue converting equipment or your perfectly networked source if you are looking for used tissue converting machinery. With an experience of more than 35 years within the tissue industry, we are able to trace surplus machines which are perfectly suited to your requirements. Due to our worldwide contacts, we are also in the position to find a buyer for any tissue converting equipment you do not need anymore. Our current machinery list contains machines for the production of

- toilet and kitchen rolls
- industrial / jumbo rolls
- napkins
- pocket handkerchiefs
- handtowels
- facial tissues
- table covers / table runners
- etc.

In the Americas, we are partners with SERVIPAP LLC
